Trident

Trident Building Consultancy – An Introduction

Our story

Proudly employee owned.

About us

Trident is a building surveying and project management consultancy, operating in all sectors across the UK. We deliver sound, reliable advice on a national scale from a solid base of qualified and experienced surveyors.

With almost three decades of experience, we've built up an amazing team of surveyors and project managers who are client focused, offering bespoke solutions as we recognise every project is unique.

We get to know our clients and their requirements, developing meaningful relationships that help us provide the best results.

Our Journey

In 1998, a shared vision ignited a new approach to building surveying. Roger Watts, Trevor Dowd, and Matt Clare dreamt of a client-centric practice that fostered a positive work environment. Their initial plan – a Central London office – soon blossomed organically. Longtime acquaintance Scott Young joined the team, spearheading the Glasgow expansion and marking the beginning of a national presence. Offices sprouted in Manchester, Bristol, Liverpool, Edinburgh, Birmingham, and finally, Leeds.

Through technological advancements and brand refinements, Trident's core values have remained constant: prioritising employee well-being and fostering a culture of continuous learning. This commitment culminated in a bold move in September 2022 – Trident became an employee-owned trust.

The founders, proud of their achievements, wanted to ensure Trident's legacy. By placing ownership in the hands of our people, we empower them to shape the company's future. Recognising our team as our greatest asset, we invest heavily in their professional development, encouraging collaboration and innovation. This commitment to employee ownership fuels our constant adaptation and growth. Continued investment and a dedication to bespoke services allow us to expand into specialist areas while maintaining our core offerings, ensuring client satisfaction throughout every project.

Our mission

Our Purpose

To work in partnership with our clients to conserve and enhance the built environment in a way that protects and improves the health of people and the planet.

Our Vision

To be recognised as a forward thinking, employee owned, market leading commercial practise with our ESG factors embedded into our advice and projects. To become known as the UKs go-to building consultancy and project management practise.

INVESTORS IN PEOPLE™ We invest in people Gold

PREACH INCLUSION Promoting Race, Ethnicity and Cultural Heritage formerly BAME in Property

THE SUNDAY TIMES Best Places to Work 2025 MEDIUM ORGANISATION

Our Values

We also work to a set of core values that are the principles, behaviours and beliefs that are at the heart of our business and drive our business decisions.

Trident

Certified B Corporation

At Trident, we are on a mission. That mission is not just to provide the best services we can to clients, consistently striving to overdeliver on our promises, but also to be a force for good for our people, wider society, and for the environment.

Our latest milestone on this journey is the achievement of B Corp accreditation. For those who don't know, B Corp accreditation is run by not-for-profit B Lab. The accreditation process is highly rigorous and assesses company performance based on five criteria, including governance, workers, community, environment and customers.

This is a phenomenal achievement and one that puts us in an exclusive club. There are just 1,700 B Corps in the UK and only 8,000 globally.

Becoming B Corp accredited is a significant achievement for us, but it's just the beginning. We'll continue to build upon our achievements and strive for even greater positive impact as we move forward.

Proudly employee owned.

Our Mission

Certification

To give some context on the requirements, a median score for an average business is 50.9 using B Corp's score metric, a score of 80 qualifies for B Corp Certification. In 2024 Trident achieved a score of 101.1.

Our score breakdown: Total 101.1

Governance	9.9	Environment	6.5
Workers	63.6	Customers	3.2
Community	17.6		

Our people

We currently employ more than 80 staff across 8 offices in the UK, enabling us to deliver sound, reliable advice on a national scale from a solid base of qualified and experienced surveyors. Our team of surveyors are not only highly trained and knowledgeable, but they also care about what they do – we are passionate about your property.

We get to know you and your requirements, developing meaningful relationships that help us provide you with the best results to maximise your property investments. We provide bespoke advice as we recognise every project is unique.

We are committed to creating an inclusive environment. We recognise that by bringing together people of all different backgrounds and experiences, we can gain a wider depth of knowledge, ideas and expertise.

Our services

Building Better, Together.

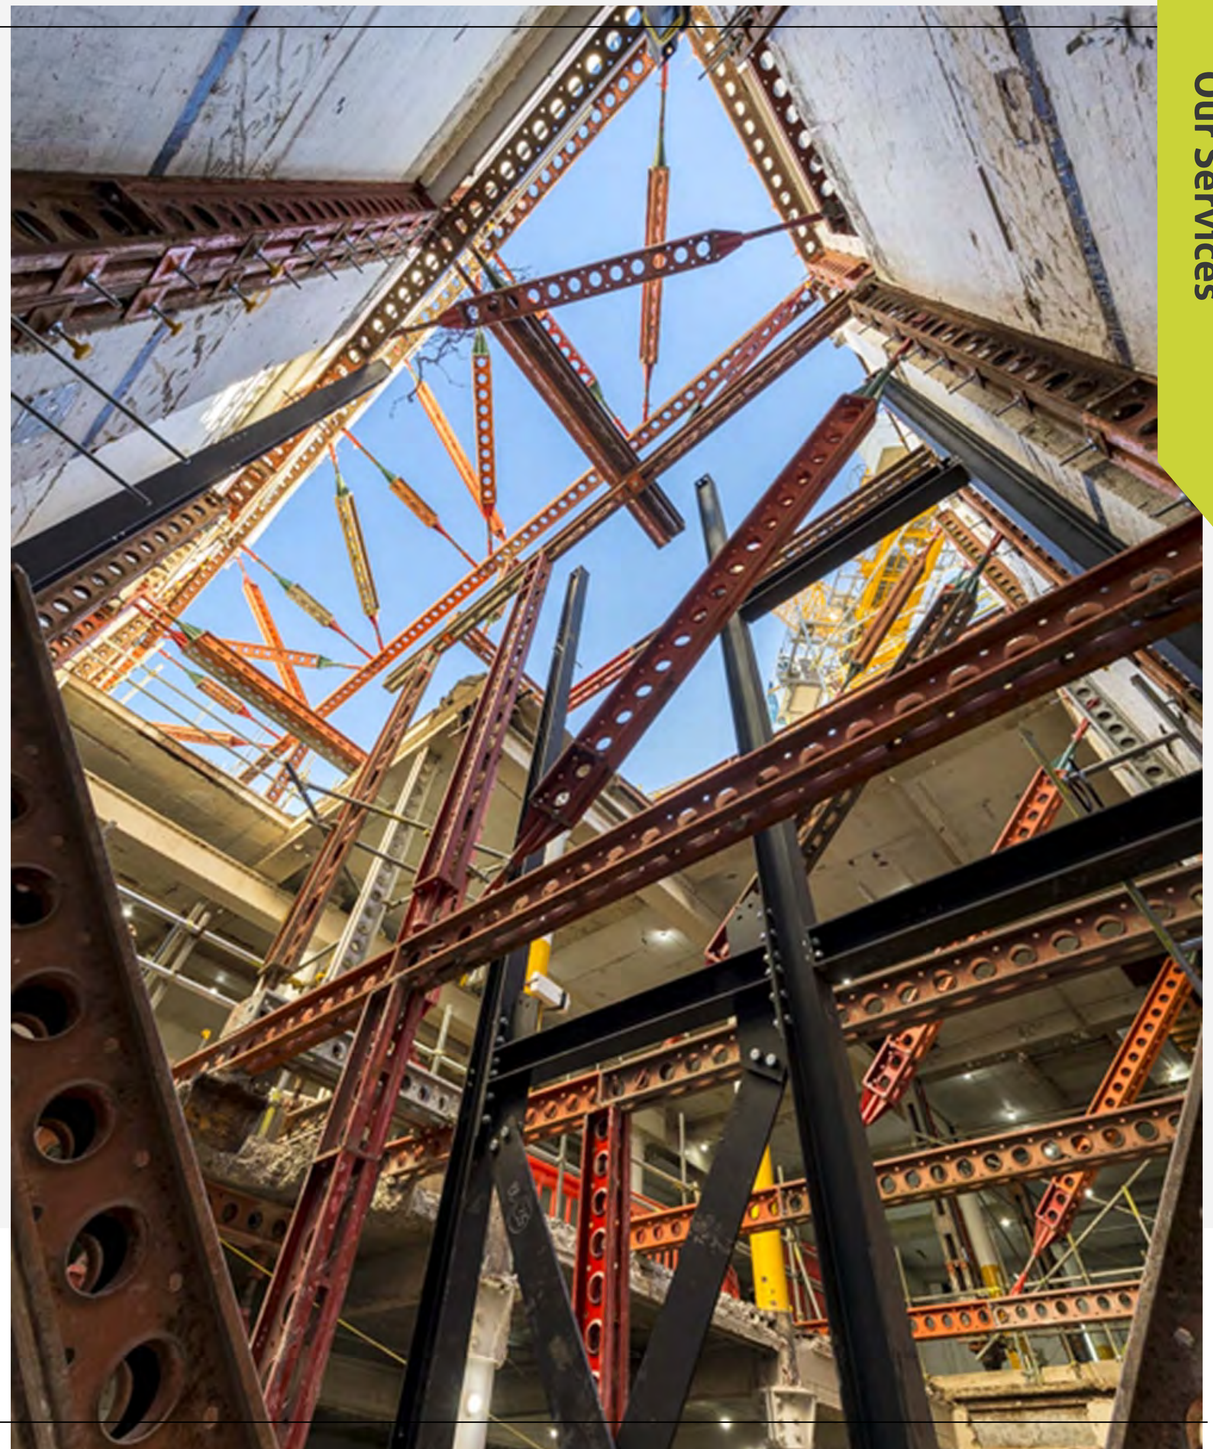
From building surveying and project management, to our specialised services, we collaborate with our clients to make a positive, lasting impact on the built environment.

We believe the best results come from thinking long-term: not just about the projects we deliver, but about the world we're helping to shape. That's why sustainability is embedded in every decision we make and recommendation we give.

With over 30 years of experience behind us, we know that strong relationships are the key to successful projects. Our partnership approach fosters trust and delivers value for clients of all sizes.

Every project starts with a solid foundation of clear communication and established procedures. This means all parties are aligned and deadlines are met, keeping your project on track.

We've built a culture that encourages specialised skill development. When a surveyor identifies interest in a specialism, we back them with training and support. As a result, clients benefit from a unique team of highly skilled professionals who can combine their expertise to deliver best-in-class services, tailored to each project's specific needs.



Our services

Building Surveying

- Building Regulations Principal Designer
- Building Reinstatement Cost Assessment
- CDM Principal Designer
- Defect Analysis / Building Pathology

ESG

We recognise that everything we do has an impact on the wider community around us, which is why we take our social, economic and environmental responsibilities seriously.

We have created a strategy, in conjunction with our people that not only supports the local community but also supports the future of the built environment, with the objective of creating a sustainable, diverse and inclusive environment that has a positive impact on everyone.

ESG

Environmental:

We believe that sustainable business practices are not just a responsibility, but a necessity for a thriving future. That's why we're taking a bold step towards achieving net zero carbon emissions by 2040.

We're committed to significant progress, with a goal to halve our greenhouse gas emissions before 2030. We'll hold ourselves accountable by disclosing our progress annually.

Taking Action for Impact

Here's how we're turning our commitment into action:

- Setting Ambitious Goals: We've meticulously measured our carbon footprint and set a science-based target through SBTi, ensuring our goals are grounded in scientific consensus.
- Building a Roadmap for Success: Our comprehensive net zero action plan outlines near and long-term targets, guiding our journey towards a sustainable future.
- Striving for Excellence: We have achieved B Corp accreditation, demonstrating our commitment to the highest social and environmental standards.
- Elevating the Industry: As members of the UK Green Building Council (UKGBC), we actively contribute to the industry's sustainability progress. Additionally, we've partnered with UKGBC to create a unique training course, empowering our building surveyors and project managers to become sustainability leaders.

We recognise the importance of collaboration in achieving a greener future. By taking action and sharing our knowledge, we can build a more sustainable future for generations to come.

ESG

Social

We believe social value is more than a concept – it's our commitment to the well-being of our communities. We recognise the interconnectedness of social, economic, and environmental health, and that we play a vital role in fostering all three.

Our social value strategy focuses on these key areas:

Empowering the Next Generation:
We invest in social mobility by providing apprenticeship and graduate programs, equipping young people with the skills and opportunities to thrive.

Strengthening Communities:
We support worthy causes and communities through strategic charitable giving and pro bono work, making a tangible impact where it matters most. We believe in the power of collective action, and we're proud to partner with LandAid in building a brighter future for young people.

By actively measuring and communicating the value we create, we strive to be a positive force in the lives of our stakeholders and the communities we serve.

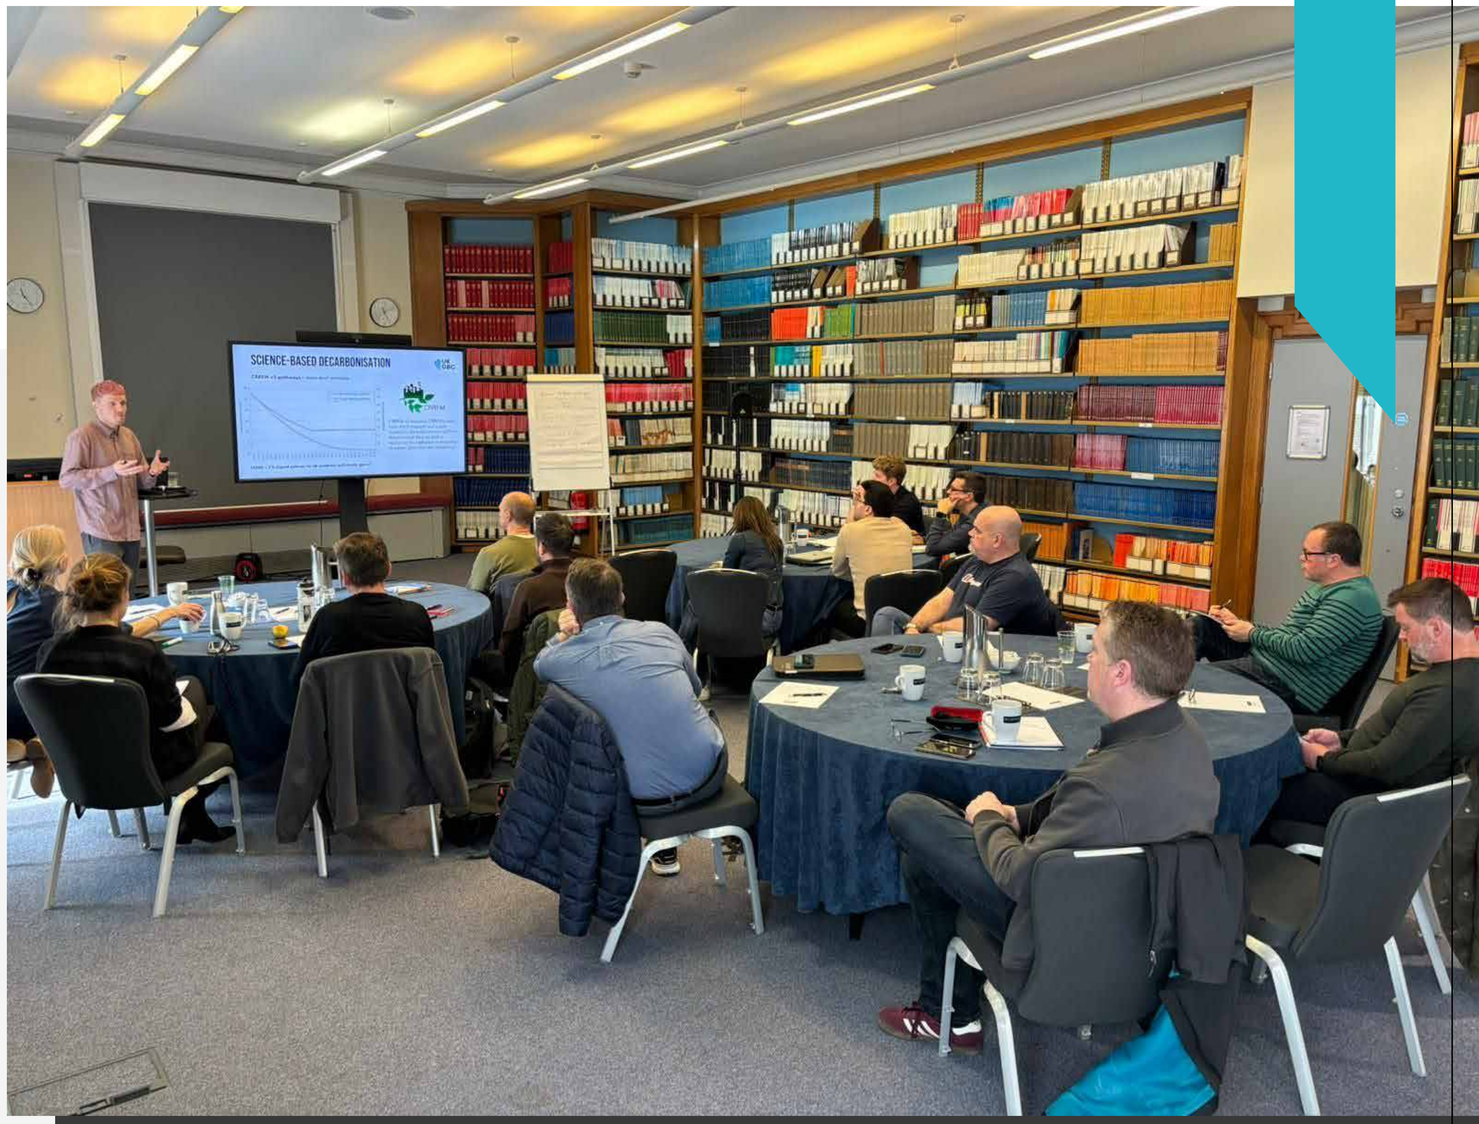
ESG

Governance

Since becoming an Employee Owned Trust (EOT) in 2022, we've embraced a culture of openness and honesty, where everyone's voice is valued. This transparency fuels our success and empowers our people to be active participants in the company's future.

We believe in fostering a collaborative environment through dedicated committees. These committees encourage participation from everyone across the business, ensuring decisions are well-informed and reflect the collective vision.

We recognise that our employees are the cornerstone of our success. We demonstrate this commitment through ongoing investments in our employment experience.



Our Accreditations:

Our awards and accreditations affirm us as meeting industry standards and best practice, demonstrate our commitment to on-going improvement and help us generate credibility and trust, with you, our clients.
